Choose Malta

With a history of over 7,000 years and located at the centre of the Mediterranean Sea, Malta is only around 100km away from mainland Europe, to which it is linked via air and sea. The Malta International Airport offers easy access through connections to most major cities across Europe and beyond. Malta is bilingual, which means that practically everyone in Malta speaks both Maltese and English fluently, making communication simple, straightforward and friendly.

Our sun-kissed islands are jam-packed with culture and history, as well as entertainment, nightlife and beaches. MCAST has a growing international community from all over the world following a diverse range of study programmes delivered in English.

Students may apply at MCAST individually and are guided towards the field of interest that is most appropriate for them. Alternatively, at MCAST we offer custom-made programmes for cohorts of students that are usually brought together by common interests and/or goals. This allows greater flexibility in terms of course delivery and time frames. As a further and higher education institution, MCAST gives you access to high-quality qualifications and degrees recognised on the European Qualifications Framework and are therefore internationally recognised.

Events

During the COVID-19 pandemic and the social gatherings restrictions, we missed the campus events at MCAST, which play an essential role in shaping each student's social and intellectual life. MCAST organised various online activities in 2020 and 2021. We are now relieved to have our community back on campus while ensuring that the health and safety of staff and students remain our priority.

As you begin to settle down, you may wonder what your campus social life will look like for the rest of the year. MCAST helps each student maximise their experience on campus by organising a variety of thematic, cultural and sports events to engage the MCAST population. With so much to do around campus, there is a little something for everyone. Here are some fun student activities:

Freshers' Days

Every year, MCAST welcomes over 7,000 new and progressing students for the upcoming Academic Year. Freshers' Days include various activities for new students to discover more about the respective Institutes and opportunities for work placements and volunteering. Freshers' Days are the perfect opportunity for students to meet many of MCAST's industry partners and local businesses and to learn more about organisations working in collaboration with MCAST. Stalls managed by local businesses and non-governmental organisations are set up, and cool stuff is given.

Diversity Day

The College celebrates Diversity Day in May on the Main Campus. Various activities promote cultural diversity to celebrate and raise awareness of the different nationalities represented at MCAST. Stalls are set up in the MCAST Student House, where students present various crafts and traditional exhibitions worldwide. Visitors have the opportunity to taste traditional food from different countries and view students dressed in traditional costumes.

Cultural Activities

Activities help students identify themselves with MCAST and assist them in developing themselves in a desired field and improving organisational, presentation, leadership, and interpersonal communication skills. As cultural activities are of paramount importance, MCAST encourages all extra-curricular activities that are both in line with the institution's educational objectives and meet the needs of the students. In this regard, each year, a creative arts festival is organised to increase brand perception and create an event that builds hype and anticipation for years to come. The ICA Festival celebrates creativity and acts as a platform to showcase the students' hard work and collaboration with relevant stakeholders in the industry.

Open Days

Open Days offer the perfect opportunity to prospective students and their families to look around the College campus, meet lecturers and current students, and speak to representatives from the College's Admissions and Outreach teams. Tours around the MCAST campus are organised, and MCAST staff can answer any questions you might have about student life on campus. Subject-specific talks are scheduled throughout the days.

Sport

Being physically active plays a significant role in maintaining a healthy lifestyle. Sports and exercise are not only beneficial to one's physical and mental health but can also have a positive effect on study results. Whether you are a serious athlete, casual gym-goer, or need to unwind before, in between or after lectures, you are welcome to visit our sports facilities on campus. Football, basketball, handball and tennis courts and pitches are available to all students and staff. You can also visit our Fitness Centre and get a chance to speak with a staff member for advice to help you get started or follow your programme. Furthermore, tournaments in different sports disciplines are organised, and all students and staff are encouraged to participate and have fun while keeping in shape.

We Care Wellbeing Hub

The Wellbeing Hub offers a variety of services directed towards self-fulfilment, serenity and health. Counselling and therapeutic interventions are provided to assist students and staff through a process of personal growth. Other specialised services focus on addictions, mental health, nutrition and sexual health. All services are provided by professionals in the relevant fields on a high level of confidentiality.

Youth Hub

The Youth Hub is a safe space for young people to chill out, relax and enjoy different indoor activities. It is also meant to be an educational hub that attracts young people's ideas that can be transformed into discussions, campaigns, projects, and activities. New opportunities and information can also be accessed.

Work-Based Learning

What is WBL?

- Work-based learning prepares you for real-world careers through a combination of relevant work experience and College-based learning.
- Work-based learning improves your career opportunities.
- Work-based learning allows you to undertake real work through the production of real goods and services.
- Work-based learning provides learners with the skills needed to be employable and progress in their professional development. Depending on the course chosen, MCAST provides work-based learning in different formats: placements, apprenticeships, internships, live cases.
- A placement offers students up to MQF Level 4 the opportunity to gain basic work experience and skills leading to a vocational qualification or award. This can be paid or unpaid at the discretion of the sponsor.
- Through an apprenticeship programme, you can obtain paid, relevant work experience combined with College-based learning in preparation for a career in different industry areas. Apprenticeships are offered in selected courses at MQF Levels 3-6.
- An internship offers students following certain programmes at MQF Level 5 or higher the opportunity to gain practical work experience leading to a vocational qualification or award. This can be paid or unpaid at the discretion of the sponsor. Live cases use the units of the creative arts programme as a vehicle through which industry experience can be gained. They enable the student to work directly with a client to research, design, develop and produce a tangible creative concept.

Entrepreneurship

The MCAST Entrepreneurship Centre (MEC) is a non-profit centre created to help MCAST students and alumni. It is the purpose of MCAST to foster economic development at MEC and promote small business development by supporting the formation and growth of new companies that will commercially develop new products and services and create new job opportunities. “

We are both MCAST graduates who read the Bachelor of Engineering (Hons) in Mechanical Engineering (Manufacturing) in 2020.

We met when we started our MCAST journey. With support from MCAST lecturers and staff, and indeed from each other, we both completed our studies successfully and are now both engineers working for one of Malta's leading manufacturing companies.

We have great respect and gratitude towards MCAST for such fruitful years and amazing lectures.
