

## **CIRCULAR 53/2020: PREVENTION BETTER THAN CURE**

**Purpose:** The purpose of this circular is to provide further information and guidance on what measures MCAST has taken and suggested prevention to minimise risks.

### **Precautions**

All premises should be well ventilated especially the canteen, classrooms, offices, workshops and laboratories. Please make sure that all windows are kept open at all times and closed at the end of the working day.

Several alcohol rubs dispenser points all over the campus have been installed, including Mosta, Luqa and Kalkara. MCAST will ensure enough supplies of alcohol rubs, soap, water and cleaning supplies for all buildings. Cleaning is being carried out with the use of sanitising products and increased measures are being taken.

In case students and members of staff are sick they should stay at home and a certificate produced that they are fit for classes/work before coming back.

Please follow all circulars including those previously issued by the Office of the Deputy Prime Minister, the Ministry of Health, as well as MCAST and MUT.

Kind regards,

**Denise Cortis**
